Families First Local Support Teams

Statement: The Families First Service is a new way of working that brings together the full range of County Council professionals that help children, young people or their families. The service covers the whole of Staffordshire but is delivered through 20 geographical patches spread across Staffordshire's eight districts. Local Support Teams consist of Children's Service professionals who work together across a patch to identify and address family needs early.

Display Scale Limitations: Available at all mapping scales.

Contact for Further Information: families.first@staffordshire.gov.uk

Youth and Community Premises

Statement: The Youth & Community Layer shows the location of all County Council held properties that provide a Youth Support Service. The following information is available for each property when selected: Property Name, Address, Function (Detailed use of property).

Display Scale Limitations: Available at all mapping scales.

Contact for Further Information: lee.wells@staffordshire.gov.uk

Public Information Kiosks

Statement: These kiosks, known as 'elephant kiosks' provide the tools to access current, national and local information to support you to achieve improved health and well being. They provide essential information on a variety of topics including; parenting, health, social care, education, benefits, leisure and tourism.

Display Scale Limitations: Available at all mapping scales.

Heat Loss (South Staffordshire)

Statement: South Staffordshire Council have taken a unique approach into tackling climate change, energy efficiency and fuel poverty by highlighting how much heat loss is generated by each building in the district.

By taking a thermal image of every building on a cold clear night in winter, we can see how much heat is being lost. These images will allow residents to find their house and see how energy efficient they are. It will also help the council identify the least thermally efficient areas, or house types, within the district and so target home energy efficiency promotions to those areas.

The analysed data shown on the image gives the heat loss from each building on a colour range from dark red (high heat loss) to dark blue (minimal heat loss). It should be stressed, however, that the image only provides a snapshot of heat loss on one particular night. It is worth remembering when looking at your property that there could be other reasons for a property apparently losing no heat, e.g. it could be there was no heating on at the time the image was taken.

Display Scale Limitations: Not shown when 'zoomed out' beyond 1:10499.

Useful Web Address: Should you want more information about home energy efficiency and the grants available to all residents, please visit South Staffordshire Council's Home Energy Savings webpage <http://www.sstaffs.gov.uk/default.aspx?page=12877>
