

Swab Test Recording Sheet

Use the grid below to record your samples and compare results.

The dirtier a sample of tape or swab is, the more pollution there will be in that location.

Remember to take the samples at roughly head height if possible.

Sample I.D.	Location E.g. School railings, outdoor shelter, playground	Stick or paste your samples on to each box below
1		
2		
3		
4		
5		

Remember to mark the locations on your map using the sample numbers above.

This will help build a picture of which areas are more polluted than others when you go back to the classroom. You can use the back of this sheet to record what you found when you compared the results with the rest of the class. Were the results what you expected? Where do you think is most polluted and why?
