FARMSTEADS IN SOUTH STAFFORDSHIRE

PLANNING ISSUES
Use the FARMSTEAD ASSESSMENT FRAMEWORK to demonstrate how development proposals comply with national and local planning policy. The National Planning Policy Framework stresses the importance of:

• Retaining and enhancing local character and distinctiveness.
• Conserving heritage assets in a manner appropriate to their significance and putting them to viable uses consistent with their conservation.

Local plan policy generally supports the re-use of significant historic buildings, and includes specific requirements and planning considerations, particularly in relation to residential additions and alterations, neighbourhood issues and taking account of biodiversity. It is important to identify any heritage assets and other designations where specific policies might apply, including listed buildings, conservation areas, Green Belt or the Cannock Chase AONB.

Use the FARMSTEAD ASSESSMENT FRAMEWORK four stages to identify and consider the need and potential for change at the earliest stage of considering change for a farmstead or farm building.

1. SITE SUMMARY
This comprises a brief description of the whole site and its landscape context, and identification of other key issues such as site access, services and designations. It provides the essential first step and can be easily completed by the applicant or developer without specialist knowledge.

2. ASSESS HERITAGE SIGNIFICANCE
Assess heritage significance of the building and site, from its contribution to local character to the significance of individual buildings.

3. NEED AND POTENTIAL FOR CHANGE
Use the understanding gained from Stages 1 and 2 to consider constraints and opportunities for sympathetic change and development, and the type of sustainable change most most to be acceptable in the planning process.

4. SITING AND DESIGN ISSUES
Design issues for the site and its buildings, and the siting of new buildings.

For English Heritage research and guidance see its HELM web pages at http://www.helm.org.uk/farmbuildings

This guidance follows the development of an evidence base for the historic character and survival of the county’s farmsteads, which has been entered on the county’s Historic Environment Record at http://www.staffordshire.gov.uk/Historic-Environment-Record It includes the mapping of historic character, survival and use of farmsteads across the county as part of the West Midlands Farmsteads and Landscapes Project (see http://www.english-heritage.org.uk/wmidlandsfarmsteads).

For planning policies in South Staffordshire see http://www.sstaffs.gov.uk/your_services/strategic_services/planning_policy_-_local_plans.aspx
TRADITIONAL FARMSTEADS IN SOUTH STAFFORDSHIRE

LEGEND

HISTORIC FARMSTEAD CHARACTER
1. 11% of the county’s farmsteads lie within the District and these are distributed fairly evenly across the authority area.
2. 60% of the traditional farmsteads have been classified as large loose courtyards (with working buildings to three or more sides of the yard), dispersed multi-yards or large regular courtyards (including E-plans, U-plans and covered yards). These farmstead types are fairly evenly dispersed across the landscape and are likely to be associated with the large estates which dominated the area by at least the late 18th century.
3. Small and medium-scale farmsteads (including regular courtyard L-plans, linear plans, and loose courtyard plans with working buildings to one or two sides of the yard) tend to be loosely clustered in and around the small villages and hamlets across the District.

SIGNIFICANCE
Farmsteads which have retained traditional buildings and/or their historic form make a positive contribution to local character and distinctiveness, whether they are designated as heritage assets or not. The greater the survival of the historic form and detail of the whole farmstead and any buildings, the greater will be its significance.

The heritage potential of traditional farmsteads, based on the survival of their historic form from Ordnance Survey maps of c. 1900, has been entered onto the Staffordshire Historic Environment Record (HER).

67% of recorded farmsteads (county average 59%) have high heritage potential as traditional farmsteads, because they have retained more than 50% of their historic form.
14% have some heritage potential because they have retained less than 50% of their historic form.
The remainder may have retained a house (which may be a listed building) or have lost all of their buildings. These may still retain archaeological deposits which can be revealed through development.

PRESENT AND FUTURE ISSUES
Research led by English Heritage (see text box on first page) has shown that historic farm buildings have been more prone to both neglect and development than any other historic building type. They are also associated with high levels of home-based business use.

The area has an above-average level of conversions to residential use.
40% of listed working farm buildings have evidence for non-agricultural reuse (40% being residential and these being associated with a very high proportion of directorships).
