

Appendix C: Indicative Costs

The applying organisation will be responsible for all costs associated with the design, approval, installation, operation, maintenance, relocation, repair, and eventual replacement of a Speed Indicator Device (SID).

Actual costs will vary depending on site-specific requirements and will be confirmed once a formal application is made.

The items of work detailed below are provided to assist an applicant's understanding of the likely financial commitment associated with a SID scheme.

Activity	Details	Indicative Cost
Site Assessment	Initial assessment of the proposal to support the applicant's gathering of required evidence for their application and identify potential installation locations.	No charge
Design Check	Technical assessment of the proposed SID location(s) including searches for underground utility apparatus. Compliance with the Construction (Design and Management) Regulations 2015 to ensure installation, operation and maintenance can be undertaken safely. Design of retention socket and post to support the SID Application for necessary permissions.	Varies with size and scope of proposals
Licence Fee	A licence under section 115E of the Highways Act 1980 to install third party equipment within the highway.	£210.00
Post Installation	Supply and installation of the required posts and retention sockets including the required permits to work within the highway and any necessary traffic management costs to implement the works.	Varies with size and scope of works

Important Note

Where additional costs arise due to unforeseen site conditions, utility conflicts, design amendments, safety requirements or traffic management requirements, these costs will remain the responsibility of the applying organisation.
